Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 12 November 2004.
- 2a) ☒ This action is FINAL. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Note: The applicant's response contains claims 7-8 and 10-13. Claims 10-13 have been renumbered to claims 9-12 by the examiner to maintain consecutive numbering in the case.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 7, 10, 11 and 12 are rejected under 35 U. S.C. 103(a) as obvious over the British reference (Deane) in view of Windall. Deane discloses the elements of claim 11. However it does not clearly disclose the use of indicia placed on the tether. Windall discloses the use of indicia on the tether (15,17,18). It would have been obvious to one of ordinary skill in the art at the time of the invention to have employed the indicia of Windall on either or both of the lines with the apparatus of Deane in order to give the user a theoretical indication as to the drive location of the ball (See Deane col 2: 28-41) and reduce the manufacturing cost and the number of sub-components (11) of the apparatus. Note that the phrases in the claim directed to the intended manner of use of the device and the number of clubs used with the device do not distinguish over the applied prior art (See MPEP 2112).

As to claim 7: The dimensions cited are a matter of design choice. The specification provides no unexpected results in using the cited non-resilient and resilient

line lengths. It would have been obvious to one of ordinary skill in the art to have selected an appropriate length and size of the tethers to insure the apparatus would operate in an appropriate manner.

As to claim 10: Deane discloses controlling the return of the ball (3: 1-7).

As to claim 12: Deane discloses ground anchors (fig 1).

Claims 8 and 9 are rejected under 35 U. S.C. 103(a) as being unpatentable over the prior art cited in view of Official Notice given in the prior office action. Official notice was given that attachment of balls and tethers are well known in the art. One of ordinary skill in the art would have selected an appropriate attachment means from one of many equivalent attachment means. The specification provides no unexpected results in using attachment means cited. It would have been obvious to one of ordinary skill in the art to have selected an appropriate attachment means to insure the apparatus would operate in a safe manner.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 3711

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
